UI Controls

This is similar to what you will see when you join a game of *Goblin Zone*. Follow along in the gameplay guide to learn more about each feature and how you can interact with your goblin.

There may be more goblins than just yours when you join. If that is the case, **your goblin is the RED one.** Enemy goblins are green.

Goblin Controls

Highlighted you will find the following controls:
- FIRE
- UP
- DOWN
- LEFT
- RIGHT

To interact with these controls, tap on them once and the goblin will respond. An explanation of each control can be found below.

FIRE: When clicked, your goblin will shoot a spear in the direction it is facing.
- You may also shake your device to shoot a spear.

UP: When clicked, your goblin will either turn in the upwards direction or, if facing up already, move one block upwards.

DOWN: When clicked, your goblin will either turn in the downward direction or, if facing down already, move one block downwards.

LEFT: When clicked, your goblin will either turn in the left direction or, if facing left already, move one block to the left.

RIGHT: When clicked, your goblin will either turn in the right direction or, if facing right already, move one block to the right.

Navigating the App

Gameplay

Double click on the image to the left to access a video of some sample gameplay!

There are other goblins and trees that you can shoot spears at to destroy.

Use your controls to move your goblin and shoot your spears.

Be careful! Other goblins can destroy you by hitting you with their spears.
